The Annual Reputable Banks and Fintech Awards/Conference,

The Annual Reputable Banks and Fintech Awards/Conference is an initiative by Reputation Poll International, designed to acknowledge rapid expansion, integration, accelerated growth and reforms of Africa's banking and financial sector.

Why the Awards?

Together with the poll from the public and customers, we wish to honour and celebrate outstanding Banks and Fintech Institutions that are moving Africa's rapidly transforming finance sector. We will celebrate the achievements of those who are driving growth, development, paving new economic opportunities for citizens and communities and inspiring the new generation of bankers who are shaping Africa's economic future.

Awards Details

The 2022 RBF Awards & Conference held between Tuesday 28th – Thursday 30th June 2022 at Raddison Red, Finnieston Quay 25 Tunnel Street, Glasgow, G3 8HL, Scotland United Kingdom.

The 2022 RBFA conference had broad range of discussions and debates by top facilitators from Africa and Europe bringing theoretical & practical experiences to guide on how various sectors can work together to promote financial inclusion. Key stakeholders include banks, insurance, donors, investors, policymakers and regulators.

SPEAKERS

Speakers

Executive Vice Chairman, Credent Capital and Advisory Limited.
Former Award-winning Executive Director, Public Sector Group
First Bank Nigeria Limited.

Dauda Lawal was born in Gusau, present day Zamfara State in Northern Nigeria. After an eventful and loving childhood, he went on to study at the Ahmadu Bello University (ABU), Zaria, Kaduna State, where he obtained his first and graduate degrees. Soon after, he moved to Washington DC, USA where he spent a number of years as an employee of the Nigerian Embassy, Washington DC. Since his return in 2003, Dauda Lawal has mainly devoted his time to Banking, Community service and academic Self-improvement – a quest that saw him enroll at and attend several courses at home and abroad, at notable Institutions such as Harvard Business School, Boston, London School of Economics, London Business School, Wharton Business School, Pennsylvania, Oxford University Business School, International Faculty of Finance, London, Fitch Training, London and New York, The Asian Banker, Accenture, Lagos Business School, Euromoney, Ernst and Young, to mention but a few.

Due to the high esteem in which he is held in northern Nigeria and beyond, he was awarded a honorary doctorate degree by one of the foremost tertiary institutions in Northern Nigeria, Usman Danfodio University, Sokoto.

One of Dauda Lawal's regular initiatives is giving back to a society he believes has given him so much.

Dr Dauda Lawal Ph.D

Payment Service Provider MobiPay Chooses BioID to Protect IDaaS

Nuremberg, Germany & Windhoek, Namibia – May 25th, 2021 – Digital Payment Service Provider MobiPay today announced to use BioID's Liveness Detection to empower their Identity as a Service solution (IDaaS) for meeting regulatory compliance. As a licensed Payment Intermediary, Mobipay is obligated to follow the highest security standards. Hence, BioID's biometric technologies have been chosen for preventing identity fraud and spoofing.

Biometric Liveness Detection for Namibia's first IDaaS

MobiPay's newest development is IDaaS, a cloud-based Identity as a Service solution for corporate and governmental clients, incorporating facial and fingerprint recognition, proof of life (liveness detection), document scanning, management and depository. IDaaS provides clients with 3rd party access via APIs and mobile applications, verifying customer identity including proof of life closely (in-branch) or remotely (web or app). Thereby, fraud and traditional KYC costs are reduced regulatory requirements are met. IDaaS allows individuals to seamlessly identify themselves digitally for all kinds of services.

Claus Deckenbrock, CEO of MobiPay: *"Mobipay processes more than 1,8 million transactions monthly in Namibia alone for all major banks, retailers and mobile operators. BioID's technologies are a major increase in security for our remote processes, while keeping up the required ease of use. Our close partnership has already proven beneficial in multiple ways."*

"We welcome MobiPay to our BWS family.", says BioID CEO Ho Chang. "Powered by state-of-the-art PAD, our BWS ensures the integrity of IDaaS services with high assurance levels throughout the entire identity life cycle, meeting rigorous regulatory compliance."

Software-Based Presentation Attack Detection

Presentation attack detection (PAD) is a mechanism for noticing spoofing attempts typically associated with identity theft. PAD detects spoofing attacks such as impersonation using a photo- or video of another person. Digital payment providers like MobiPay must enforce strict regulations such as Know Your Customer (KYC) to prevent money laundering and identity theft. As manual processes are costly, cumbersome and cannot be concluded in real-time, unsupervised self-serve remote identity verification is strongly on the rise worldwide. For an automated remote selfie verification like MobiPay's IDaaS, strong and powerful PAD is the essence.

BioID's anti-spoofing technology has been serving the industry for years. It has been tested by two independent laboratories in Germany and France to be in conformity with ISO/IEC 30107-3. In addition, BioID Liveness Detection works with any standard smartphone camera or webcam, hence is perfect for end-user applications like MobiPay's IDaaS.

Innovation in Payment Technology

With the launch of TipMe Liberia over a decade ago, TipMe Global began its journey to connect individuals and businesses across Sub-Saharan Africa on one seamless platform.

Rokel Commercial Bank (SL) Ltd. Is The Dominant Bank In The Market Place Providing About 25% Of All Banking Business In The Country, Rokel Is Well Known for Its Innovation In Terms Of Products And Services.

Recommendation(s):

1. Each nominee (individual) should have their photo added
2. The other nominees with the exception of Mr Lawal, still need their life stories attached
3. The Fintech category should be renamed to: Most innovative Fintech solution Award or Best Fintech Award.
4. Which award are the banks nominated for? Best customer service, most innovative bank, most secure and safe bank?
